Durabond[®] Floor Covering Installation System

Warranty Duration Table

The duration of the Limited Warranty for products that are used as part of a qualifying Durabond Floor Covering Installation System is set forth in the following table. To be considered a qualifying Durabond Floor Covering Installation System, your installation system must use (1) two or more products and (2) only products listed in the following table. If the product is used as part of a qualifying Durabond Floor Covering Installation System, the duration of this Warranty is the lesser of either (1) the duration of the flooring manufacturer’s warranty for the flooring product being installed or (2) ten years. If different products used in your installation system have different Warranty durations, the shortest Warranty duration for any product in your system is the applicable Warranty duration for your entire system. In the event of a valid claim under the Limited Warranty that relates to products used in a qualifying Durabond Floor Covering Installation System, Bostik shall pay a pro rata portion (the “Bostik Share”) of the reasonable cost of materials and labor, on a square foot basis, necessary to repair or replace the portion of the original installation that is proven to be defective (the “Repair or Replacement Cost”). The Bostik Share will be the proportionate share of the total Repair or Replacement Cost that represents the remaining time on this Warranty. The Bostik Share will be calculated by multiplying the total Repair or Replacement Costs by a fraction that represents the number of days remaining on this Warranty at the time of the claim divided by the total number of days of the Warranty duration at the time of purchase.
